- Max speed = 30 knots
- Equipped with Twin 115 HP Mercury SeaPro outboard engines.
- Marine radio communications system.
- Transport Canada registered.
- Equipped with dive ladder for dive operations.
- Equipped with emergency recovery davit.
- Stability test completed by marine surveyors.

## “Pro-Dive Ocean Diver” Dive Boat Specification

The “Pro-Dive Ocean Diver” is equipped with a surface supplied dive system consisting of a 3-Diver panel capable of supplying independent feeds to two working Divers with a separate supply line for the stand by Diver. The dive system is fed by an air bank consisting of six K-cylinders rated at 2,000 psi. Pro-Dive utilises 106 m twisted umbilicals as manufactured by Umbilicals International and Kirby Morgan KMB37 hard shell diving helmets. Communication with the Divers is achieved with four wire Diver communications with “Round Robin” open circuit facility to helmets using AmCom III communication box manufactured by Amron International. Dive control uses an AxSub Diver Data Management system for capturing all video and photos; as well as, recording an electronic copy of the Diver’s dive profile.
